Tipologia: fiore corretto e stampato.
 Origine: bovine europee.
 Tipo di concia: ai sali di cromo.
 Tintura: all'anilina passante in botte.
 Spessore: mm 1,0/1,2.
 Queste pelli vengono sottoposte ad una leggera smerigliatura e ristampa che le donano un aspetto uniforme ed una notevole resistenza ai segni del tempo.

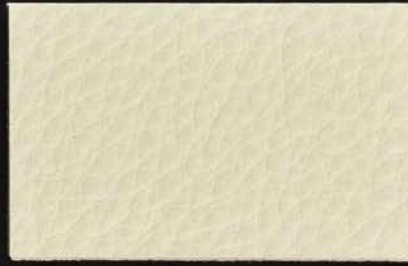

Pelle/Leather
CARDIFF

CAT. 20

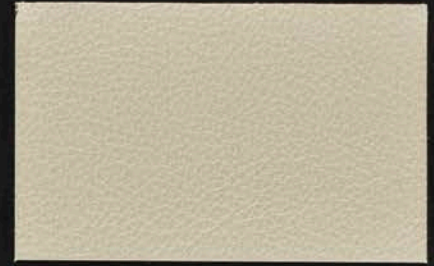

Leather type: corrected grain, embossed.
 Raw material: European cow hides.
 Tannage: chrome tannage.
 Dyeing: aniline through-dyeing.
 Thickness: mm 1.0/1.2.
 Certified "Leather from Italy - full cycle".
 These leathers are subjected to a light buffing and reprinting treatment that gives them an even appearance and make them very resistant to aging.

Tipologia: fiore corretto a grana naturale.

Origine: bovine europee.

Tipo di concia: ai sali di cromo.

Tintura: all'anilina passante in botte.

Spessore: mm 1,0/1,2.

La leggera ristampa a grana naturale che la caratterizza non copre la pelle e lascia intravedere graffi, rughe e piccole cicatrici che sono garanzia della naturalezza del prodotto.

Leather type: corrected grain, naturally embossed.

Raw material: European cow hides.

Tannage: chrome tannage.

Dyeing: aniline through-dyeing.

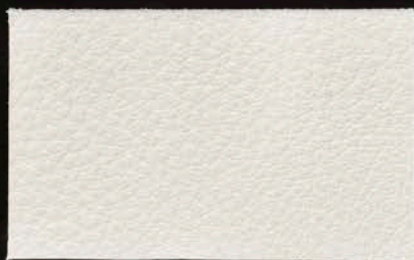

Thickness: mm 1.0/1.2.

Certified "Leather from Italy - full cycle".

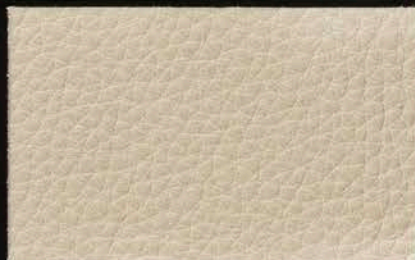

The light natural-grain reprinting carried out on this leather does not hide it. Rather, scratches, wrinkles and small scars remain visible as guarantees of a natural product.

Tipologia: pieno fiore a grana naturale.
 Origine: tori europei.
 Tipo di concia: ai sali di cromo.
 Tintura: all'anilina passante in botte. Spessore: mm 1,3/1,5.
 L'assenza totale di smerigliatura (pelle a pieno fiore) e l'uso molto limitato di tinture e rifiniture coprenti determinano che la pelle è viva, traspirante, con un tatto incredibilmente pieno e morbido. La presenza di graffi, rughe e piccole cicatrici è garanzia della naturalezza del prodotto.

Leather type: full grain, not embossed
 Raw material: European bull hides.
 Tannage: chrome tannage.
 Dyeing: aniline through-dyeing. Thickness: mm 1.3/1.5.
 Certified "Leather from Italy - full cycle".
 The total absence of buffing (it is full-grain leather) and the very limited use of dyes and of camouflaging finishes result in the leather being alive and transpiring and offering an incredibly full and soft feel to the touch. Any scratches, wrinkles or small scars guarantee that this is a natural product.

Pelle/Leather
MILANO

CAT. 30

Tipologia: pieno fiore a grana fine.
Origine: vitelloni europei.
Tipo di concia: ai sali di cromo.
Tintura: all'anilina passante in botte.
Ingrasso: oli vegetali e sintetici.
Spessore: mm 1,3/1,5.

È la massima espressione della naturalezza della pelle perchè priva di rifiniture coprenti. Il suo aspetto è in continua evoluzione in quanto i segni del vissuto quotidiano rimangono piacevolmente impressi conferendo ad ogni pelle una preziosa unicità.

*Leather type: fine full grain.
Raw material: European bullock.
Tannage: chrome tannage.
Dyeing: aniline through-dyeing.
Grease process: vegetable and synthetic oils.
Thickness: mm 1.3/1.5.*

It is the utmost expression of the natural origins of leather because there are no covering finishes. Its appearance is continuously evolving because the marks of everyday life remain pleasantly impressed in the leather, making each one precious and unique.
